What makes our PSAT Prep course unique from other test preparation groups?

- When you sign up for our class, you know exactly who will be teaching your students, our credentials, and our successful track record.
- We teach content. Most PSAT prep courses only teach students testing tricks like how to guess and check. In addition to teaching students these tricks, we also re-teach the academic content which helps students succeed not only on the PSAT, but also on other standardized tests and in the academic classroom.
- You can contact us anytime with questions about your student and his or her particular testing situation.
- Our curriculum is based on published SAT standards and students practice from actual SAT/PSAT tests.
- We enjoy what we do! We enjoy helping students feel successful on standardized tests, and we know that what we do makes a difference in their lives.
